

The service that XM radio provides is extremely helpfull to me while on the road. The ability to get clear and accurate weather and traffic reports for the city I am going to or in is crucial. You can not always get this on public radio at the time you need it. If you are in a trange town you do not know the stations and therefore fumbling around looking for them, which the safety experts say is a cause of accidents.

I urge my congressman to get involved in this discussion and vote against any change in the service XM radio provides me and my fellow travelers.
